GENERAL INFORMATION:

APPLICANT: Allefs, Josephus J.H.M.

APPLICANT: VOSSEN v.d., Edwin A.G.

APPLICANT: VOSSEN v.d., Edwin A.G.

TITLE OF INVENTION: WUCLEIC ACID ENCODING PRODUCT THAT PROVIDES PLANTS WITH TITLE OF INVENTION: FUNGAL RESISTANCE AND RELATED METHODS

FILE REFERENCE: U 0.14413-9

CURRENT APPLICATION NUMBER: US/10/360,522

CURRENT FILING DATE: 2003-02-07

PRIOR APPLICATION NUMBER: EP 02075565.8

PRIOR APPLICATION NUMBER: PCT/NL03/00091

PRIOR FILING DATE: 2003-02-07

NUMBER OF SEQ ID NOS: 63

SOFTWARE: PASTENTIN Ver. 2.1

SEQ ID NO 49

Site 2: Xhol; supplier: Developmental series. Sterile st.
sections from pathogen-free Solanum tuberosum var.
Shepody, clone 1756, nuclear stock were cultured in
Magenta boxes containing 1/10 strength MS medium,
solidified with 0.8% (w/v) Phytagar. Roots of all sizes,
originating from the stem bottoms were collected from
these cultures, washed to remove residual Phytagar, and
used in RNA isolations and library construction."

This invention relates to a novel isolated nucleic acid molecule encoding a plant disease resistance polypeptide. The preferred plant is a solanaceous plant that is potato. The resistance is to late blight disease, caused by the fungus Phytophthora infestans. The invention is useful for conferring pathogen resistance in plants using a Solanum bulbocastanum late blight resistance gene. The present sequence is the protein encoded by the S bulbcastanum cDNA sequence of the invention.

Claim 10; SEQ ID NO 2; 103pp; English.

New isolated Solanum bulbocastanum late blight resistance nucleic acid molecule encoding a plant disease resistance polypeptide, useful for conferring pathogen resistance to Phytophthora infestans in plants.

The preferred plant is a solanaceous plant that is potato. The resistance is to late blight disease, caused by the fungus Phytophthora infestans. The invention is useful for conferring pathogen resistance in plants using a Solanum bulbocastanum late blight resistance gene. The present sequence is the protein encoded by the S bulbcastanum cDNA sequence of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              New isolated Solanum bulbocastanum late blight resistance nucleic acomolecule encoding a plant disease resistance polypeptide, useful for conferring pathogen resistance to Phytophthora infestans in plants.
                                                                                                                                                                                                                                                                                                                                             Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 N-PSDB;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Osumi T,

The preferred plant is a solanaceous plant that is potato. The resistance is to late blight disease, caused by the fungus Phytophthora infestans. The invention is useful for conferring pathogen resistance in plants using a Solanum bulbocastanum late blight resistance gene. The present sequence is that of a protein encoded by a chimeric transgene of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                New isolated Solanum bulbocastanum late blight resistance nucleic acomolecule encoding a plant disease resistance polypeptide, useful for conferring pathogen resistance to Phytophthora infestans in plants.

This invention relates to a novel isolated nucleic acid molecule encodi a plant disease resistance polypeptide. The preferred plant is a solanaceous plant that is potato. The resistance is to late blight disease, caused by the fungus Phytophthora infestans. The invention is useful for conferring pathogen resistance in plants using a Solanum bulbocastanum late blight resistance gene. The present sequence is the protein encoded by the S bulbcastanum Sbul 2 gene sequence which was us
                                                                                                           New isolated Solanum bulbocastanum late blight resistance nucleic a molecule encoding a plant disease resistance polypeptide, useful fo conferring pathogen resistance to Phytophthora infestans in plants.
                                                                                                                                                                                                                                                                                                                                         Solanum bulbocastanum

                                                                                                                    S
                                                                                                                                                                                                                                                                                  CC This invention relates to novel isolated polynucleotides that confer CC resistance against late blight caused by the comycete pathogen CC Phytophthora infestans, which threatens both tomato and potato crops. CC Specifically, it refers to a gene cluster (namely Rpi-blb) that encodes CC leucine-rich repeat (LRR) proteins identified in Solanum bubocastanum, CC and which cause disease resistance to bacteria, fungi, nematodes etc. CC These R genes, namely Rpi-blb, RGC1-blb, RGC3-blb and RGC4-blb, can be CC described as plant growth regulants. They are useful in providing cresistance to Phytophthora infestans, especially in Solanum tuberosum (CC (potato) plants to protect against comycete infection or to demonstrate CC disease susceptibility. Resistance can be conferred by transformation of existing potato and tomato cultivars with the gene, a procedure that is more straightforward and faster than conventional introgression breeding. This polympeptide sequence is the Solanum bulbocastanum RGC3-blb protein of the invention.
                                                                                                                                                                                   Query Match

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   This invention relates to a novel DNA sequence in the field of plant disease, in particular comycete infections. The DNA sequence encodes a protein which may provide a plant or its progeny with at least partial resistance against an comycete infection caused by Phytophthora infestans. The invention may be useful for the development of compounds with a fungicide activity. The DNA sequence of the invention encodes an Api-blb protein comprising 970 amino acids. The nucleic acid, vector, cell, protein or binding molecule is useful for providing a plant or its progeny with resistance against an comycete infection such as late blight (a disease of major importance to production of Solanaceae such as potato and tomato cultivars). The present sequence is that of a protein which was used for homology purposes in the exemplification of the invention.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Solanum bulbocastanum
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       New isolated or recombinant Rpi-blb nucleic acids and proteins, useful for providing members of the Solanaceae family e.g. Solanaceae tuberosum with resistance against oomycete infection.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Allefs JJHM, Van Der Vossen EAG;
